

Accommodation Coin

THE BEST THING TO HAPPEN TO ACCOMMODATION...EVER

What are the use cases that make Accommodation coin such a good investment for both users/hosts?

1. Accommodation coin is ideal for loyalty programs, this means that repeat customers/guests can be rewarded by their host/hotel with accommodation coin this can then be redeemed for services/offers, or when Accommodation coin is live on an exchange, can be traded or sold. Partners/hosts will be able to advertise via the app to our network of users.
2. Accommodation coin will introduce the first universal rating and reward system, this will allow both hosts and guests to rate each other based on their experience a bit like airbnb's 5 star system, then hosts and guests who consistency achieve high ratings will be rewarded with accommodation coin, thus helping to increase good performance across our network of hosts and guests.
3. Accommodation coin will be the first accommodation specific network and crypto currency that will reward users for sharing their booking data with the network, as an example when you book a stay with booking.com or any other booking/hotel partner you will be given the option to 'sell' that information to the accommodation coin network, you will be paid in accommodation coin for this information. That information is then used to make our network bigger and better, but is also used to allow hosts and partners to better understand our users with vital marketing information. Of course accommodation coin once listed on an exchange can be then used for payment of accommodation as well.

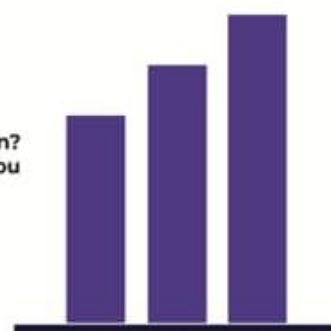

Quick stats on Accommodation coin thus far
